SUMMARY

As a software developer, I am deeply passionate about tackling complex problems with creative solutions. With two years of hands-on experience in the field, I recognized the power of software to make a global impact and set out to create applications that solve real-world issues. Driven by a background in systems thinking, I relish the challenge of developing websites and applications that transcend borders and connect people worldwide. Having honed my skills through various projects, including those for clients, I am confident in my ability to deliver exceptional results. It brings me immense satisfaction to bring my clients' visions to life by conceptualizing their ideas and utilizing my technical expertise to make them a reality

EXPERIENCE

Full Stack Software Developer
Kris Codes   **January 2022 - Present, Online**

· Developing full-stack software websites for mid-sized companies and individual businesses, I have successfully completed over 10 projects, including client assignments. My work incorporates the latest technologies and best coding practices, such as utilizing the MERN stack and MVC model, to ensure robust and efficient solutions. For a comprehensive overview of my accomplishments, please refer to my personal portfolio website, where you can find detailed information, website and application links, and GitHub links to the source code.

Financial Advisor
Servus Credit Union   **May 2018 - January 2022, Edmonton**

· I gave financial planning advice with regards to investments (GIC and Mutual Funds), and loan products including mortgages, insurance, and business/personal accounts and products

Customer Service Representative
TD Canada Trust   **April 2014 - April 2018, Edmonton**

· I provided outstanding customer service by handling day-to-day transactions and identified opportunities to refer customers to other departments for loans and investments

EDUCATION

Degree of Business Administration - Finance
NAIT · Edmonton, AB · 2018

CERTIFICATIONS

Understanding TypeScript
Udemy, Online · 2023

In this course, I learned TypeScript from the ground up, delving into its powerful features and how to effectively utilize them. Starting from the basics, I gained a solid understanding of types and how they enhance JavaScript code. I discovered how TypeScript improves code quality, helps prevent bugs, and provides a seamless way to bring modern JavaScript features to any environment or codebase. Additionally, I explored advanced topics such as decorators and learned how to set up workflows using TypeScript and webpack. The course also provided practical insights on integrating Third-Party JavaScript libraries and using TypeScript with popular frameworks like ReactJS and Node/Express. Overall, I acquired the skills to write better code and gained a competitive edge in the dynamic world of web development by harnessing the full potential of TypeScript

The Web Developer Bootcamp 2023
Colt Steele Bootcamp · 2022

In my first bootcamp, I learned the most relevant topics in the industry. Taught by a professional bootcamp instructor, I built 13+ projects, including a gigantic production application called YelpCamp, while learning modern tools and technologies such as HTML5, CSS3, JavaScript, NodeJS, MongoDB, and more

CSS - The Complete Guide 2022 (Incl. FlexBox, Grid & Sass)
Udemy, Online · 2022

I completed a comprehensive CSS course that covered all the essential topics from selectors, properties, and inheritance to advanced concepts like responsive design, Flexbox, CSS Grid, animations, and fonts. The course provided practical examples, quizzes, and a real project to apply the knowledge learned

React - The Complete Guide (Incl Hooks, React Router, Redux)
Udemy, Online · 2022

In this React Bootcamp, I learned the key fundamentals and advanced concepts of React, including components, data binding, state management, React hooks, debugging, styling, HTTP requests, Redux, React Router, Next.js, authentication, unit tests, and animations. Through examples and demo projects, I gained practical knowledge to build client and practice projects

NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno)
Udemy, Online · 2022
In this Node.js bootcamp, I learned the basics of Node.js, including core modules, REST APIs, and GraphQL APIs. I also gained skills in building real-time web services. Throughout the course, I completed two major projects - an online shop and a blog - which allowed me to apply and refine my skills. As a result, I was able to level up my Node.js and MERN stack skills from beginner to advanced

SKILLS

Redux, Redux Toolkit Query, CSS, Tailwind CSS, Framer-Motion, Material UI, Bootstrap, React, NextJS, HTML
MVC Model, Javascript, JWT's, OAuth, PostMan, NodeJS, MongoDB, Sanity v3, REST API's, TypeScript
